

Multivitamins

Biovid Forte Film-Coated Tablet Vitamins

Formulation

Each film-coated tablet contains:

Pyridoxine HCl (Vitamin B6)	250.0 mg
Thiamine Mononitrate (Vitamin B1)	242.5 mg
Cyanocobalamin (Vitamin B12)	1.0 mg

Description

Oblong, peach film-coated tablet, convex faces and scored on one face.

Actions and Pharmacology

Cyanocobalamin acts as a coenzyme for fat and carbohydrate metabolism. It is essential for growth, cell replication, haematopoiesis and nucleoprotein and myelin synthesis. Thiamine pyrophosphate and pyridoxal phosphate, the physiologically active forms of thiamine and pyridoxine respectively, act as coenzymes for various metabolic functions affecting protein, carbohydrate and lipid metabolism. The B vitamins are readily absorbed orally except in malabsorption syndromes, metabolised in the liver and excreted via the kidneys.

Indications

For the prevention and treatment of Vitamin B1, B6 and B12 deficiencies.

Contraindications

Not recommended for patients with Leber's disease since optic nerve atrophy may occur.

Precautions

Caution in patients with history of gout or hepatic disease.

Adverse Effects

Diarrhoea and itching may occur occasionally.

Drug Interactions

Biovid Forte Tablet may reduce the effects of levodopa.

Overdosage

Biovid Forte Tablet is usually well tolerated.

Dosage and Administration

Adults: Oral, 1 tablet daily; or as prescribed by physician.
