TOCOVID ®SupraBio 50 mg softgel capsule
 TOCOVID ®SupraBio 100 mg softgel capsule
 TOCOVID ®SupraBio 200 mg softgel capsule

Vitamins/Antioxidant

With the **new bio-optimum absorption system**, the contents of the soft gelatin capsule forms emulsion instantly upon contact with the fluid in our stomach. Therefore its absorption no longer depends on food and fat intake. Not only does this increase the absorption of Tocotrienols by **200% to 300%**, but a more consistent and complete absorption is ensured.

Tocotrienols (T3) in TOCOVID ®SupraBio are important as they protect the body cells from damages by being a substitute target for free radicals.

Free radicals are very reactive. They attack healthy cells. We are most often subjected to free radicals from air pollution, cigarette smoke, UV radiation, fried and burnt food and from food contaminants like pesticides. If their effects are not neutralized, free radicals may pose a potential danger in causing arterial damage, cataract, skin damage, Alzheimer's disease and premature aging.

T3s are mostly extracted in their natural form from palm oil and rice oil. Among these two, palm tocotrienols possess a higher content of delta- and gamma-tocotrienol, 2 of the most effective tocotrienols, shown in studies to have potential in **lowering cholesterol**, and **preventing the processes that clog arteries**.

Safety:

Toxicological and pharmacological studies indicate that palm T3s are safe even when consumed at doses as high as 2500mg/kg body weight. No adverse effect has been reported. Furthermore, its contents are 100% natural, conferring only the best benefits phytonutrients can offer.

Recommended dosage:

50 mg : 1 to 2 softgel capsules a day.
 100 mg : 1 softgel capsule a day.
 200 mg : 1 softgel capsule a day.

Packaging:

50 mg softgel capsule x 30's
 100 mg softgel capsule x 30's
 200 mg softgel capsule x 30's

TOCOVID ®SupraBio 50 mg:
 Store at temperatures not exceeding 30°C.
 Protect from light and moisture.

TOCOVID ®SupraBio 100 mg & 200 mg:
 Store at temperatures not exceeding 25°C.
 Protect from light and moisture.
